

CONQUERING COMPLEXITY

Announcing New DELTA V Technology to Improve Automation Costs and Schedule

Date: MAY 27th, 2010

Location:
Vancouver Convention Centre

Time: 2:30 pm to 5:00pm
Cocktails and Hor D'Oeuvres reception to follow

RSVP: amack@norpaccontrols.com

**Compressed schedules?
Late Changes?
Hate being on the critical path?**

**Many OEM packages to integrate?
Too many drawing changes?**

Sound familiar?.....

- **"This release received a lot of buzz right from the early stages, but what Emerson showed us represented fundamental rethinking of how control systems are wired and the elimination of conventional I/O"** ARC Group
- **"Emerson ...overturns 35 years of industry thinking of I/O"** Insider, Oct 2009
- **"The new DeltaV S-series ... is a fundamental, innovative rethink of I/O wiring called 'I/O on Demand'. Bravo Emerson team for yet another engineering and market coup!"** Jim Pinto, Industry Pundit, Oct 2009
- **"Electronic Marshalling ... looks beyond pure technology to really understand the entire process to achieve the end goal most economically"** Bill Lydon, Automation.com

INSIDER

Many of our local customers heard about this new release and have asked to see it live. Please join us for a special overview conducted by **Nathan Pettus**, DeltaV Global Sales Leader for Emerson Process Management.
