

Emerson Global Users Exchange  
Sept 10 -14, 2007

Emerson is once again hosting the Global Users Exchange, this year in Grapevine (Dallas), Texas. We have had fantastic feedback from this educational event in previous years, and will once again be participating in an organized visit to the exchange.

*"This event is run by users for users"*

*"This is probably one of the best things I've ever been to. It could be 2 weeks long."*

*"You bring stuff back that pays for the trip"*

*"I can choose one event each year, and I choose the exchange over all other trade shows because I learn so much more"*

We will post more information once we organize a visit schedule, but please contact us if you are interested in participating in this event.
